Vision Scout Ultra Waders

£449.00

AVAILABLE FEB 2017

We think that Vision Scout waders are the most comfortable waders to wear. Period.

They are made from a special fabric featuring revolutionary 37.5^Å® Technology and proven ultrasonic welding technology.

Durable, comfy and good-looking waders with a bunch of well-thought-out details. Get yourself a pair and you will always Be Prepared.

To continue at the forefront of wader development in the world and to secure our leading role in Europe, year 2017 will see some big changes in our wader strategy. We have felt that most of the modern high-end waders are heavy, stiff and their breathability capabilities are not what they used to be. We wanted to change that and feel that wonderful “Do-I-have-waders- on-or-not?” “feeling when we wade into a cold mountain river or “Why-don’t-I-sweat-at-all” when we hike to the next sweet spot somewhere kilometres away. To achieve these ambitious goals, we have already worked for two years to introduce a totally new generation of waders.

Scout waders are a pleasure to wear, will stay waterproof even when used actively for a longer period of time in highly challenging conditions and which will transfer your sweat from your body faster than any other pair of waders. Based on extensive testing all around the world, we can happily inform that we have achieved those objectives. 37.5^Å® Technology combined with Ultrasonic welding technology is a winning combination, which is very hard if not impossible to beat. So, get your Scout waders and you’ll be prepared.

- Latest fabric featuring 37.5^Å® Technology and ultrasonic welding technology. - Fully waterproof chest pocket with YKK Aquaseal^Å® zipper - Seam optimization secured with our new E-Tape - 3 “ compartment flip pocket - Heavier bottom fabric, lighter upper fabric - High density wading belt and braces - Curved NoSeam cut for perfect fit - Matching color belt and braces - D-loops and drying loops - Built-in gravel guards - Ultimate comfort V9600.
